

AMCO

Bridgework repairs

July 2016

7 weeks

We were contracted by AMCO Rail to undertake refurbishment works to an Rail Underbridge in Walsall as part of AMCO's CP5 Framework Contract with Network Rail.

The project consisted of grit blasting and painting to exposed metalwork, installation of 24Nr tie bars and brickwork repairs to the abutments and wing-walls.

A proportion of the works were completed from a fully encapsulated scaffold during normal hours with the remaining works being undertaken during railway possessions.
