

I-Line

Capital Valley
Drainage

March 2019

4 weeks

We were contracted by I-Line to complete drainage works at Capital Valley, Pontypool.

Our works included:

- To tie into two existing surface water manholes at approximately 3m depth, to include all repointing and reinstatement works
- To install approximately 60m of 1.2 diameter twin walled drainage pipe at an average depth of 3m, using the open cut stepped excavation method.
- Reinstatement of embankments top soiling and site clearance
- To tie into existing weir wall outfall, including all repointing and reinstatement works.
- Reinstatement and re seeding of access point and access track.
