

Buckingham Group

Footbridge

May 2018

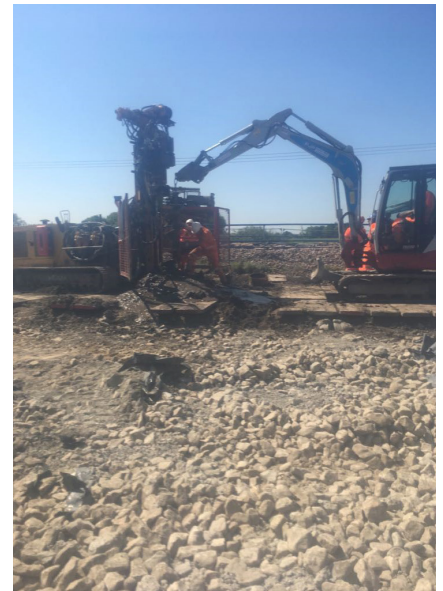

5 weeks

We were contracted by Buckingham Group for a footbridge project at Red Moss, Horwich.

Our scope was to install 28nr piles required adjacent to the railway line at Horwich for a new footbridge.

The pile lengths were 15m to 21m deep, 450mm diameter and required a 6m permanent liner installing.

Four dynamic working test piles were carried out and all the piles were TDR integrity tested.
