

Costain

Platform alterations

December 2016

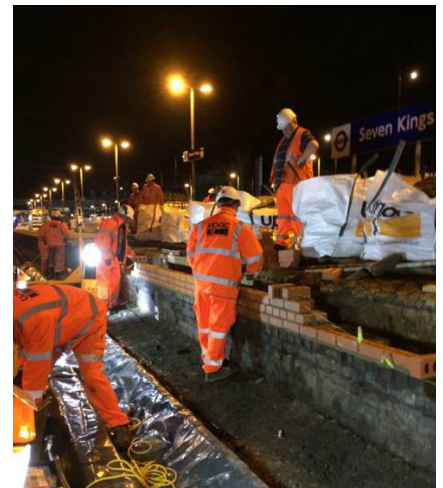

26 weeks

**We were contracted by Costain to deliver the Stepping & Gauging works at various stations from Liverpool Street to Shenfield.**

These works form part of the Crossrail project to allow new trains to run. The platform alterations include the removal of existing coping stones to the platform edge, and a rebuild of the brickwork platform prior to laying new coping stones to a new line & level.

This also includes the laying of new tactiles and redressing the platform surface (paving slabs & tarmac). Works at Seven Kings Station were carried out over the Christmas period and handed back on time, incident free and on budget.
