

Buckingham

Platform Upgrades

July 2015

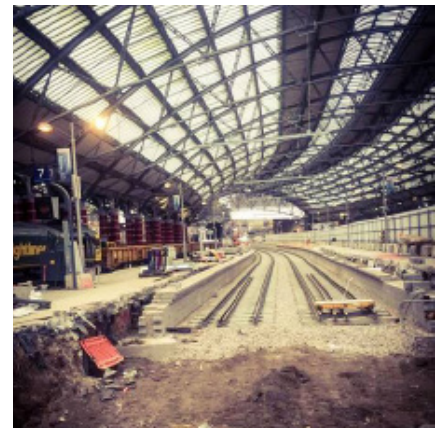

Ongoing

We were contracted by Buckingham to carry out upgrades to all the station platforms and surrounding support network for Liverpool Lime Street station.

This project is a complete overhaul of Liverpool Lime Street Station, Universal Resource Solutions have played a major part in delivering one of the most prestigious rail civil projects in the UK.

We have provided most of the supervision, trades men, safety critical staff, plant operatives, ground workers as well as general operatives to construct the new platforms to all of the 10 lines. We also added new drainage systems, new waiting rooms, surfacing to all platforms and hundreds of miles of new troughing and cables amongst all other activities.

Throughout the duration of this project Universal Resource Solutions have provided 212 operatives over 35 different trades, we have supplied over 171,865 hours.
