

Job Description: Site Engineer

Universal Group are seeking a Site Engineer to join our team.

Established in 2009, Universal Group has grown year-on-year to become a leading contractor for all ground engineering, labour and piling plant needs.

The successful candidate will report in the Commercial Director and will be required to:

- The completion and maintenance of site paperwork (WPPs, TBS, ITP)
- Work with our procurement team and suppliers to deliver material approvals in a timely fashion
- Use surveying equipment to set out building lines
- The ability to use EDM machines
- Have knowledge of site calibration checks
- Resolve any unexpected technical difficulties and other problems that may arise
- Provide technical advice
- Have a good understanding of temporary works design

The ideal Candidate should:

- Come from a Civil Engineering background, minimum of 2 years' experience in Rail Civils, working for a contractor
- Have the ability to solicit views across multiple parties, lead discussions and manage inter-dependencies
- Have a strong commercial background
- Have the ability to build and develop relationships quickly and concisely

You will be based at our head office in Huthwaite but will be expected to be on site 2-3 days per week, depending on the specific needs at that time. Sites will be located across the UK. You will predominantly be working on our civils division but may also be required to work with our piling team.

This position is for 47.5hrs per week over 5 days but will be based on the needs of the business.

This position is a full time, permanent position.

Salary: £30,000.00 to £40,000.00 per year
