

Lend Lease

Foundations for  
floodlights

July 2014

4 weeks

**We were contracted by Lend Lease to undertake the piling, ducting and foundation works to a MUGA pitch for the floodlight foundations.**

We carried out the design, supply and installation of 6nr 450mm diameter piles with temporary casings to 11 meters in depth.

We also did the associated pile caps and the ducting works to the perimeter. This project was undertaken on time and within budget.
